

TECH RIDER

MICROPHONE: One professional level Lavalier microphone with lapel clip and Two Wireless Handheld Microphones and two straight Microphone stands.

STAGE: Stage size should be 8 feet by 12 feet with sufficient height for Sean to be seen clearly by the full audience. Typically 1.5 to 3 feet in height. Stairs leading onto stage must be secure and have hand rail to assure safety for participants coming on and off stage.

LIGHTING: General stage wash of lighting. Good clear stage light for audience to see speaker and participants. If there is positional lighting, it should be focused on the central performing area.

AUDIENCE: Chairs/ tables should be no further than ten feet away from the stage to create the most direct, interactive experience. All dining must be completed before the performance set is to begin.

LARGE AUDIENCES: For audiences over 500, image magnification including at least one dedicated camera and two dedicated projection screens is preferred.

GREEN ROOM: Whenever possible, having a dedicated Green Room where Sean can store any necessary equipment, and await the performance start time is preferred. Please stock with two bottles of water.

DEDICATED LAPTOP AND CLICKER: As slides are utilized in Sean's keynote, having access to a dedicated laptop where the slide deck is integrated into the event flow is preferred, as well as having a capable presentation clicker for the laptop.
